

No problem 👍 Since you don't have a resume file on the laptop, we can create a simple test PDF just for testing. You don't need to use your real resume.

Step 1

Open **Notepad** and type:

```
Vishnu Priya M
```

```
Python Full Stack Developer
```

```
Skills:
```

```
Python
```

```
Django
```

```
HTML
```

```
CSS
```

```
Bootstrap
```

```
SQLite
```

Save it as:

```
test_resume.txt
```

Then tell me once it's saved. I'll give you the next step.

kaviya

Yes 😊 Since your current test account is **Kaviya**, use Kaviya in the test resume.

Step 1

Open Notepad and enter:

```
Kaviya
```

```
Python Full Stack Developer
```

```
Skills:
```

```
Python
```

```
Django
```

```
HTML
```

```
CSS
```

```
Bootstrap
```

```
SQLite
```

Save it as `test_resume.txt` .

Then tell me “**saved**”.

saved

Good 👍

But `.txt` cannot be uploaded because our form is meant for PDF/DOCX.

Step 2

Let's convert your `test_resume.txt` into a PDF.

Open the file → press **Ctrl + P** → select **Microsoft Print to PDF** → click **Print** → save it as:

`test_resume.pdf`

Tell me when the PDF is saved.
